HINTS. The designers of ball room costumes appear to be much more desirous of eccentric effects than of grace or beauty. Although these gowns frequently com-bine all the qualities of beauty, their extreme oddity is sometimes attained at even the cost of good tasts. Fur is combined with the gauziest of fabrics, and jet and gold trimmings are used in abundance. Flowers, feathers, and in abundance. Flowers, feathers, and in fact almost anything to render an evening toilet elaborate, is within the bounds of fashion. Of evening slippers are of gold, silver or black silk cord in open work designs, sometimes enriched with gems; the dainty rich stocking of a shade to match the costume shines through the interstices, and sometimes a rhinestone crescent or star is set upon

In shoes, cloth tops are considered more dressy than kid, and the height of fashion is attained when the tops are of the same goods as the sostume. Side the same goods as the dostume. Side laced boots reaching to the knee are considered very stylish, but they will hardly be popular as so much patience is required in putting them on.

Well matched gloves are essential to a tasteful costume, and the variety of colors in gloves this season rivals that of the dress goods. The most striking feature of the new gloves is the buttons. feature of the new gloves is the buttons, which are very large. These may not be altogether as pretty as small buttons, but they are decidedly more convenient and substantial.

The large corsage bouquet is a thing of the past, and in its stead we find a beautiful rose with a stem about two feet long. Gentlemen's bontonnieres are very large, however, and are

renerally composed of large flowers.

As a substitute for the expensiv feather ruche and boa, those made or reuelled silk are used. These are be oming and not costly. Girdles are very stylish, and any kind of a girdle is worn. The black hats with their forests of

hey are so solemn looking, and i perchance a flower or two nestles amidst the sable plumage, it seems as if it were but a part of the floral offerings to the dear departed.

Like monster turtles are some of the hats in shape, and the reptile kingdom is furthermore represented by the jetted and jeweled snakes which often composes an entire bonnet, and between whose toils appears, in the most utterly rrelevant manners, a knot of violets of crimson-hearted rose. Coquettish little toques are made of irridescent impian breasts or of the plumage of the golden pheasant; they go with any costume, and as a rule, are The Stanley hat-named in honor of the explorer's—is round in shape with a very narrow brim, a round puffed crown, and a single quill feather erect Violets appear to be the favorite mi linery blossom, for they peep out from folds of black velvet, yellow gauze or even blue; the blue must, however, be of that very pale greenish that, or the contrast is abominable.
